

SCHLOTTMANN'S

Cocktails & Catering

Our bars are made for events and daily assembly and disassembly.

Which is why the bars' design has wheels, is very compact when disassembled for transport, and has a structure made of stainless steel.

The esthetic elements, such as the encasement of the bars and the bar top, are easily exchangeable. This is how we can ensure that the bars still look great even after hundreds of events.

In addition, the base module of the bar can be combined with a rack extension, and used as a back bar or illuminated buffet element.

We have diligently put the requirements for mobile bars into action:

- outstanding esthetics
- flexible design
- quick assembly and disassembly
- extreme longevity
- ease of cleaning

A single bar segment can be assembled by one person in around five minutes.

Optional elements include corner sections, integrated beverage taps, sinks or cooling.
